

Pass Through P 7041

Pass Through P 7041

This quite flat pass through has been designed for simple cash and document transactions and is also used in addition to transfer tray units.

It is installed in porters' and reception desks as well as in banks, cash points and general cashier desks.

The pass-through height of 30 mm is sufficient for Euro coin rolls.

Construction and finish

The flat tray is produced from durable, impact plastic with an extremely abrasion-resistant black structure lacquering (RAL 9005, Jet black).

The bearing plate is from 2,0 mm strong, zinc-coated steel sheet.

Installation

The tray can be inserted from above into the prepared cut-out of the counter. The edges of the frame cover the cut-out. For a completely flush installation, the 1,5 mm thick cover edge can be milled into the desk.

With the clamp brackets that are included in the delivery, the tray is from below invisibly fastened to the desk plate

It needs to be guaranteed that in case of any repair or maintenance work at a later stage, the unit can be easily dismantled.

Scope of delivery (Item No.: 100545)

Pass Through P 7041 – execution standard black with 6 pcs. clamp brackets
